# 1. INTRO TO MCWEEDY ECOSYSTEM

**GET  
5% +**

**ABSTRACT:** The Toker Token and McWeedy NugHeadz NFT Project combines Cannabis and Crypto. All of the benefits of Defi combined with Cannabis for Degens.

Crypto Utility Tokens , and NFTs to provide ownership in a Real World Marijuana Grow and Processing businesses with a DAO actively controlling business decisions made by the Grow and Manufacturing part of the business.

The goal is to create a community-driven ecosystem centered around cannabis and hemp-related products with a direct tie to Defi. The project introduces the Toker Token as a Utility Token and the Weedy NugHeadz NFTs which provide Real World ownership in the McWeedy LLC and act as a membership device granting access to the McWeedy DAO for business activities related to the LLC while sharing in IP rights for traits associated with the NFT.

Community members are able to design their own traits and if a real world product such as McWeedy Swag is sold based on the trait, the designer and NFT holder(s) with the trait share in the profits.

The Toker Token and McWeedy NugHeadz NFT Project tie DEFI to Cannabis in a meaningful way. By introducing the Toker Token and the McWeedy NugHeadz NFTs, the project creates a unique ecosystem that combines decentralized ownership, community participation, and real-world benefits within the McWeedy LLC and control of the LLC by the McWeedy DAO.

## HOW TO SHILL:

Community participation will be awarded. First level 5% related to sales of tokens and NFTs with 2.5% for second level affiliates 1.5% for 3rd level, and 1% for 4th level. Instead of allocating 10% of the funds to a marketing budget, we are allocating the funds back to the community who help drive it forward.

## 2. TOKER TOKEN

2.1 The Toker Token (THC) is a utility token built on the Binance Smart. Its primary purpose is to facilitate transactions within the McWeedy ecosystem and provide community members with rewards. At the fair market launch, a total of 840.000.000.000,000 Toker Tokens will be minted. 50% will be burnt at mint leaving 420 Trillion Tokens.

The Toker Token will be used as a medium to trade for Cannabis, Cannabis related products, Hemp Products and CBD products along with McWeedy swag. Toker Tokens will provide a way for community members to purchase real world products from the McWeedy LLC and to transfer profit to McWeedy Nugheadz NFT holders from the McWeedy LLC.

## 2.2 Fair Launch Toker Token Sale: Launch August 2, 19:37 EST

Same price for everyone - no unfair advantage. No market manipulation. Holding Toker Tokens automatically Whitelists for McWeedy Nugheadz NFT Pre-Mint. All funds minus referral rewards from Fair Launch Sale on pinksale.finance will be used to set-up liquidity pool with 33.2% of tokens reserved for the pool which will be locked for 420 days.

Post fair launch, unsold Tokens will be burnt, reducing the total supply and increasing scarcity. 6.2% of tokens will be made available for CEX trading. The Toker Contract will be renounced.

## 2.3 Token Burning on Buy and Sell:

0.6942071069% Burn TAX on BUY and SALE of Tokens.

## 2.4 Toker Token Referral 5% + 5%:

A 5% referral for affiliates to be paid in BNB on pinksale.finance. Up to an additional 5% will be paid to multi-level referrals in Toker Tokens 60 days after fair launch sale. 2.5% 2nd level, 1.5% 3rd level and 1% at 4th level.

## 2.5 NFT Token Drop

Each NFT will come with 710 Million Toker Tokens. 1.69% of Toker Tokens unlocks two weeks after NFT mint. NFT pre-mint spots can be purchased with Toker Tokens at a 10% discount. NFT pre-mint starts October 10, 2023, 69 days after Toker Fair Launch on pinksale.finance.

## 2.6 Zealy.io

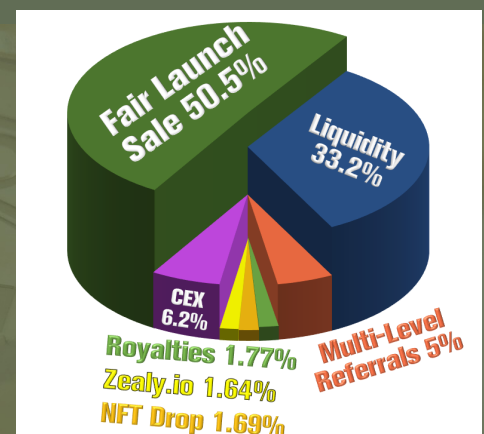

1.64% of Tokens reserved for Zealy.io rewards to be air dropped 7 days prior to NFT Pre-Mint.

## 2.7 Token Give away with McWeedy Swag Purchase, Trait Design and as Royalties

1.77% of Tokens will be locked for rewards for purchase of McWeedy Swag and rewards for Royalties for the designers of the Swag. SWAG will be based on traits designed for the NFTs.

As an example, If you design a t-shirt for the NFTs that sells in real life. Rewards go to designer, and holder(s) of NFTs with that trait. 33% of profits to designer / 33% split among NFT Holder(s) with that trait, 33% to McWeedy LLC to run the system. Going forward Toker Tokens will be purchased once the reward allocation runs out.

Trait designers are given 50 Million Tokens per trait. Additional 50 million tokens per item purchased until allocation used. 66% of profits from Swag to purchase Tokens. Random awards for memes

# 3. MCWEEDY NUGHEADZ NFTS

McWeedy NugHeadz NFTs are unique digital assets to be minted on the Binance Smart Chain. Each NFT will be priced at 4.20 BNB. A total of 10,000 McWeedy NugHeadz NFTs will be minted. Ownership of an NFT will allow real-world ownership of the McWeedy LLC and Membership in the McWeedy DAO. Minting opens October 17, 19:82 EST.

## 3.1 Pre-Mint - Toker Token Holders:

Each Toker Token Holders will be allowed to secure pre-mint spots though pre-payment with a 5% discount. A snapshot of Toker holders will be taken 72 hours before pre-mint spots are released.

## 3.2 Post Mint - Toker Token Airdrop:

As an additional incentive, each McWeedy NugHeadz NFT owner will be airdropped 690 million Toker Tokens. This reward aims to enhance the value proposition for NFT holders and foster their participation in the McWeedy ecosystem.

## 3.3 Post Mint – 5% Referral Bonus:

A 5% referral bonus will be paid post mint to registered addresses from Zealy.io and Pinksale. If a person buys Toker Tokens through pinksale.finance and has a referral associated with them there, the address will carry forward to NFT sales.

If a person buys an NFT and multiple claims result, (1 for Pinksale / one for Zealy) the referral that will be credited is the first one in time. Multiple referrals for the same purchase are not allowed. Self-Referrals are not allowed. Referral rewards for NFTs are Multi-level. Tokens are also multi-level but only first level rewarded at time of sale. To be SAFU compliant the Token rewards will be locked until Pre-NFT mint.

Trait Design and SWAG rewards will be airdropped pre-mint.

# 4. MCWEEDY DAO AND MCWEEDY LLC

The McWeedy DAO is a decentralized autonomous organization that governs the operations and decision-making processes of the McWeedy LLC. McWeedy LLC is a real-world entity for the cultivation and processing of cannabis and hemp-related products.

## 4.1 Profit Allocation by Toker Tokens:

70% of the profits generated by the McWeedy LLC will be used to buy Toker Tokens from the open market. The Toker Tokens will be available to be claimed via the McWeedy Member Dashboard for McWeedy NugHeadz NFT holders on a monthly basis. Rewards will be proportionate to the length of time their NFTs have been held. Tokens will remain available to NFT holders and be able to be claimed at any time while the NFT is held by the owner to reduce claim fees. Tokens will not transfer with ownership of the NFT. Unclaimed rewards will revert to the McWeedy DAO 1 year and 1 day after being rewarded if unclaimed.

## 4.2 Profit Reserve

30% will be reserved for future growth of McWeedy and/or unforeseen operating expenses. The DOA can vote to change this allocation.

# 5. ROYALTIES / IP- OWNERSHIP

As previously stated, 1.77% of Tokens will be locked for rewards for purchase of McWeedy Swag and rewards as Royalties for the designers of the Swag. SWAG will be based on traits designed for the NFTs.

As an example, If you design a t-shirt, mug or whatever else can be printed on demand and used as trait for the NFTs that can also be sold in real life. Rewards will go to designer of the trait, and the holder(s) of NFTs with that trait. If no purchases of the trait in the real World happen for over a 6 months the trait may be retired from the catalog. Burning Toker Tokens can revive the trait.

NFT holders will be able to swap out traits by burning Toker Tokens.

When McWeedy Swag is purchased, 33% of profits of the real world product will go to the designer of the trait and 33% of profits will be split among NFT Holder(s) with that trait, 34% of profits will be used by the McWeedy LLC to run the system. Going forward Toker Tokens will be purchased once the reward allocation runs out.

Trait designers will be given 100 Million Tokes per accepted trait pre-NFT mint. 100 million tokens will be given out per item purchased until the initial reserve is gone. (Samples can be ordered of products with no profit allocation.)

Going forward 66% of profits from Swag will be used to purchase Toker Tokens.

The DAO can modify the percentages by vote or discontinue the project post nft mint.

# 6. ROLLING THE CRYPTO-CHRONIC-CASH CROP

The Toker Token and McWeedy NugHead NFT Project present a unique opportunity for participants to engage in a community-driven ecosystem that merges the benefits of DEFI and real-world ownership in the cannabis and hemp industry. Through strategic token purchases and burning mechanisms, the value of the Toker Token has a possibility to increase over time, providing potential benefits to token holders who do not hold NFTs.

By initiating a fair market launch of the Toker Token and creating a Liquidity Pool with sale funds and subsequently burning of unpurchased Toker Tokens, the fair market launch aims to create scarcity and reduce the token supply while at the same time ensuring a fair price and the ability to easily liquidate Tokens going forward. This deliberate reduction in supply aligns with the principle of “Earn it to Burn It.”

The project's commitment to buying Toker Tokens from the open market, using 70% of the profits generated by the McWeedy LLC, reinforces a positive feedback loop. As the McWeedy LLC continues to thrive and generate profits through its cannabis operations, the buyback of Toker Tokens creates additional demand.

Burning of tokens on purchases and sales of the Toker Tokens further reduces the token supply, increasing scarcity and helps to reduce market manipulation. This deflationary mechanism aims to reward early token holders by rewarding them with a reduced supply of tokens, making each remaining token more valuable.

The McWeedy NugHeadz NFTs serve as an integral component of the ecosystem. By combining the ownership of McWeedy NugHeadz NFTs with real-world ownership in the McWeedy DAO and McWeedy LLC, participants gain direct involvement and benefits from the profits generated by the cannabis and hemp-related operations.

Through strategic token purchases, burning mechanisms, and real-world partnerships, IP rewards, the Toker Token and McWeedy NugHeadz NFT Project aims to increase the value of the Toker Token over time. This project offers participants the opportunity to be part of a community-driven ecosystem that combines cryptocurrency, NFT ownership, and the cannabis industry. However, it's important for individuals to conduct their own research and due diligence before participating in any investment or token acquisition.

# LEGAL NOTICES & DISCLAIMERS

This project involves significant risk as Cannabis is still illegal at a Federal Level in the United States. Crypto is inherently risky and is not fully regulated. The Securities Exchange Commission (“SEC”) at any time can decide this project should be considered a registered security. <https://www.sec.gov/news/press-release/2017-131> Or, the United State Congress can make Crypto illegal, tax it excessively or take your pick of any government over steps to stop Degens from degening. You may lose your entire investment. You may not be able to sell your Toker Token(s) or McWeedy NFT(s), and you may have to hold your crypto Assets indefinitely.

The McWeedy LLC intends to make all financial information about its business and financial condition available as close as possible to real time for Members of the DAO, but it will be up to the DAO members themselves to determine what information will be available to the public.

NFT Pre-mint spots will be released in tranches of 5% of spots opening every 30 minutes to Token Holders at corresponding holding levels if at any level the amount of spots have sold out an additional 100 spots will open at the previous level for 30 minutes delaying the release accordingly. 500 spots available to top 5% of Token Holder, 30 minutes later 1000 total open spots to top 10% of token holders unless 500 spots have been sold then an additional 100 spots will open for top 5 % holders. Discounts will be eliminated for additional spots and there will be a 10% increase in price until the next release level. If the Pre-Mint does not sell out, then any overage charges will be refunded and the 5% discount will be refunded minus gas fees. These refunds will be claimable via the NFT Dashboard.

Rewards will not transfer with the NFT. Rewards that are unclaimed will revert to the treasury upon sales of NFTs. Any rewards that are unclaimed after 1 year will revert to the treasury. The par value of a McWeedy Nugheadz NFT is to be considered \$0.01 because if at anytime this goes to court the nuclear option of recalling all NFT(s) by the DAO at \$0.01 should be on the table. No one that owns an NFT would want, that but let’s keep a suicidal nuclear option on the table.

# MORE LEGAL NOTICES & DISCLAIMERS ...

No expectations of profit should be expected from the Toker Token or McWeedy NFTS. One example of a possible shit storm is that if the SEC seeks to declare either the Token or NFT a Security or bring a suit related to McWeedy or the Toker Token so that the funds raised will most likely have to be liquidated to refund holders, pay legal fees and fines or some combination. Effectively, the SEC can determine whether or not these Tokens and/or NFTs can be sold to U.S. investors and could compel this project to register with the SEC as a security or make it so painful to operate that the DAO decides to say, "Fuck It" and votes to pack it all in and liquidate. The SEC is not a ray of sunshine and hope related to Marijuana-Related Companies. <https://www.sec.gov/resources-investors/investor-alerts-bulletins/ia-marijuana>

At any time a 51% vote majority of holders of NFTs could decide to end the project leaving the other 49% assed out.

This project is taking every effort to comply with laws related to the SEC and IRS. Such as requiring active participation by members. Certain cryptocurrencies and initial coin offerings (ICOs) may be found to meet the definition of an "investment contract" under the Howey test by their very nature.

The benefits one is to expect to from Membership in the DAO are to be weighted against active participation in the DAO.

Due to reporting related to Cannabis investment no more than 2.5% of ownership of NFT collection can be held by any one person or entity. Ownership of greater than 2.5% will be treated as 2.5% for rewards and decision making in the DAO. Unless, the holder of more than 2.5% of the projects qualifies for the purpose of investing in Cannabis and chooses to fully identify themselves for the purposes of reporting investors to the governing commissions related to cannabis investing.

# EVEN MORE LEGAL NOTICES & DISCLAIMERS ...

The Toker Token contract will be renounced.

Active participation is required. Non-active participants are subject to liquidation at fair market value of their NFT(s). Notice will be give prior to liquidation.

The New Jersey Superior court in Hudson County New Jersey, United States is the Legal Venue for any actions under New Jersey State Law. Mandatory Arbitration is required before any lawsuit is brought. Any disputed ownership of NFTs will be decided by the McWeedy DAO members who are not subject to the dispute.

Any lawsuit brought by a member or former member of the McWeedy DAO or holder of Toker Tokens or former holder of Token Tokers agree to pay \$250,000 plus legal costs for bringing a law suit if they have not already sought arbitration in the State of New Jersey or lose their suit and are subject to being black listed from the project.

There is a 7.5% Creator Fee / Royalty on the McWeedy NugHeadz NFTs. The fee will be reduced to 0% for trades made on the McWeedy platform or for direct trades not involving resale platforms. 33% of all creator fees will be used to sweep the floor of available NFTs on various NFT resellers through OpenSeas Pro or for direct purchase from members. 33% will be reward to Trait IP creators for any traits on the NFTs. The remaining 34% will be used to maintain the infrastructure related to the project.

NFT traits will be interchangeable on the NFTs by burning Toker Tokens to modify the holders NFT.

All NFT traits are subject to the Whim of the McWeedy DAO. If a trait is considered offensive it can be recalled upon a 51% majority vote with 50% or more of holders voting. Initial release of traits will be handled by the staff of the McWeedy LLC. Rejected traits can be put up to the vote of the DAO.

Terms and conditions can be modified at anytime. NFT Holders and Toker Token holders are subject to these terms and conditions.
